

New Garbage Bins Update:

As we had previously advised, the Association's efforts which, by the way, were fully supported by Parkbridge, resulted in Simcoe County undertaking to review the possibility of making smaller bins available to those who feel unable to handle and/or store the large bins currently delivered.

We are pleased to announce that, at a Simcoe council meeting today, a motion to make smaller bins available on request was passed! Please be aware that, at this time, details of how the exchange will take place and the time line are not known. We will advise residents once these details are available.

We shall of course have to cope with the large bins for some time. How each of us will store them does of course depend on our individual lots. But please, whatever you decide, do not keep them in a place that that could interfere with snow plowing; especially not in the vicinity of driveways. This could result in incomplete plowing or damaged bins - neither of which are desirable or helpful.
